ALWAN FARHAN AZIZ

IT Infrastructure

Bekasi, West Java |+62 89678194404 |alwwwan.farhan@gmail.com|LinkedIn|Github|Website

Professional Summary

IT Infrastructure and Support Technician with 3+ years of experience in manufacturing environments, handling daily IT operations, network setup, and user support. Experienced in troubleshooting devices, configuring network connectivity for production machines, and managing user access using Active Directory and Intune. Used to working in production-critical environments, ensuring systems, network, and infrastructure (CCTV, PABX, access control) run smoothly. Familiar with VLAN, subnetting, and basic network security, and have experience supporting enterprise applications such as ERP systems. Also have basic automation skills using Python and PowerShell, and currently improving skills in networking, system administration, and virtualization.

Skills

Networking:
VLAN, IP Addressing, Subnetting, VPN, Routing, Network Segmentation
System & Infrastructure:
Active Directory, Azure AD (Intune), Windows Deployment, Linux (Ubuntu)
IT Support:
Troubleshooting, Hardware Support (PC, Laptop, Printer), System Cloning
Infrastructure:
CCTV (NVR), PABX, Access Control System
Applications:
ERP (Hercules, Rainbow, Vega), HDA Ticketing, MPD Monitoring
Tools:
MikroTik, Cisco, Fortinet (basic), Wireshark
Automation:
Python, PowerShell

Work Experience

PT Supravisi Rama Optik Manufacturing (EssilorLuxottica)

IT Infrastructure & Operational Engineer

2022 – March 2026

- Performed end-user support including troubleshooting PC, laptop, and printers (laser, label, card printer)
- Installed, configured, and maintained operating systems including provisioning and device enrollment via Intune
- Managed user access and identity, including account provisioning, blocking, and unlocking via directory services
- Configured network connectivity for production machines including IP addressing and subnetting

- Implemented and maintained network segmentation for production and office environments
- Installed and maintained infrastructure systems including CCTV (NVR), PABX, and access control systems
- Supported enterprise applications (ERP: Hercules, Rainbow, Vega), MPD (user activity), and HDA (ticketing system)
- Monitored and ensured stable connectivity for production machines and critical systems
- Performed system cloning and deployment for endpoint standardization
- Provided hardware support and replacement for damaged or faulty devices
- Coordinated with regional IT teams for escalation and advanced troubleshooting
- Supported regional projects involving production machines (remote edging, flash UV, DLX)
- Developed automation scripts using Python and PowerShell to improve operational efficiency
- Supported 100+ users across production and office environments
- Managed network connectivity for multiple production machines

Key Impact:

- Reduced infrastructure incidents by 40–50% through proactive monitoring and troubleshooting
- Improved network reliability in production-critical environment

Freelance – Web Scraping & Automation (Upwork)

2025 – Present

- Developed automation scripts for data extraction using Python (Requests, BeautifulSoup, Selenium)
- Built scalable scraping solutions for dynamic websites
- Delivered structured data (CSV/JSON) for business use
- Developed simple APIs using FastAPI for data delivery

PT Amartha Mikro Fintek

IT Support (Contract) – 2022

- Assisted branch IT setup and infrastructure deployment

Madrasah Ibtidaiyah Assuyutiyaa

Teacher & IT Support – 2020 – 2022

- Provided IT support for devices and CCTV systems
- Taught English and basic computer skills

PT Mitratek Indonesia

IT Support – 2016 – 2017

- Assisted LAN installation and access point deployment

Project Highlights

Enterprise Network Segmentation (Manufacturing)

Implemented VLAN-based segmentation for production systems

- Improved network stability and security
- Industrial Machine Network Integration

Integrated machines into LAN with proper IP addressing

- Ensured stable operation in production environment

Automation & Monitoring Tools

- Built scripts to automate monitoring and reduce manual workload

Education

1. Bachelor of Computer Science – STMIK Al Muslim (2023 - Present)
2. Bachelor of English Literature – STBA JIA (2016 - 2020)

Certificates

3. Cisco Certified Network Associate (CCNA), MikroTik Certified Network Associate (MTCNA), Fortinet NSE 4, Network Support and Security Cisco Networking Academy, Linux System Administration

Languages

4. English (TOEFL 550) | Japanese (JFT A2)
